Bestell.-Nr.
02.PKZU1100

Key Features

Pre-installed multi-colored LED lights allow for fun night flying

Modular design that makes replacement of broken parts quicker and easier

Removable landing gear

Spektrum™ DSM2™ radio technology eliminates interference so you can fly multiple planes at the same time

Throttle, rudder and elevator provide true 3-channel flight and maneuverability

Ready-to-fly right from the box—everything you need is included inside, even the batteries

Overview

Like the original Vapor,® the Night Vapor™ is slow enough and light enough to fly in a living room, a basement, or even the conference room at work. To this amazing slow flight performance it adds the fun of LED lights that allow you to fly in the dark. It also features a new modular design that makes replacement of broken parts quicker and easier. Best of all, you can have the Night Vapor RTF flying in as little time as it takes you to charge its battery.

Needed to Complete

Nothing! Everything is included in the box.
