

## **STAMPEDE 4x4**

1/10 SCALE 4WD MONSTER TRUCK

## OVERVIEW

### STAMPEDE 4X4 BRUSHED 1/10 Scale Brushed High-Performance Monster Truck!

- **NEW!** Traxxas 4amp DC Peak Detecting Fast Charger
- **NEW!** Traxxas 7-cell NiMH battery with iD™
- TQ 2.4GHz Radio System
- Waterproof Electronics for All-Weather Driving Excitement
- Titan® 12-Turn 550 Motor
- Powerful XL-5 Waterproof Electronic Speed Control
- Traxxas' High-Current Connector (patented)
- 30+mph!\*

## Powered by Fun

Whether you're going through muddy water crossings or just having fun crushing your buddies' cars, the Stampede 4X4 just doesn't know when to quit. The Stampede 4X4 is overbuilt and Traxxas Tough to withstand all the 4-wheel drive monster mayhem you can dish out. Its tall, drive-over-anything ground clearance and ultra-tough, long-arm suspension make Stampede 4X4 feel nearly indestructible. Chrome All-Star™ 2.8" wheels give Stampede 4X4 aggressive style, and soft Chevron Maxx™ tires deliver true multi-terrain capability. The XL-5 ESC and Titan 550 motor dish out plenty of driving excitement. It's all waterproof, so the fun keeps going through all kinds of wet conditions! No other truck offers Stampede 4X4's unique style, capability, and reputation for durability. Stampede 4X4 is perfect for almost any age driver or skill level and comes fully assembled, painted, and Ready-to-Drive with included 7-cell 8.4V NiMH battery pack and charger. Speed, style, versatility, and fun...Stampede 4X4 has it all!

## Chassis Optimized for Monster Fun

Stampede 4X4 is built on the proven performance of the advanced shaft-driven 4WD system and innovative modular design of the award-winning Slash 4X4. The chassis fully integrates the electronics and battery compartment for an efficient and compact layout, and maintains the high center ground clearance that gives Stampede its monster stance and high-riding look. The extra clearance drastically increases the off-road versatility that allows you to tackle rougher terrain and bigger obstacles. The Stampede 4X4 feels planted and secure at speed, even on pavement and in other high-grip conditions. Stampede 4X4 is 100% monster truck, but it handles like a racing machine!

### 4amp DC Peak Detecting Fast Charger

For quick, convenient, hassle-free charging, a 4amp DC fast charger is included to maximize runtime and minimize down time. The included NiMH charger uses a 12-Volt DC power

outlet for universal high-output charging. The brilliant LED provides charging status as soon as the battery is connected. The charger is optimized for charging your Traxxas iD Power Cell NiMH battery. Peak-detection circuitry makes sure the battery receives a full charge every time. The status LED flashes green to indicate when charging is in progress, then turns solid green when charging is complete for foolproof charging, peak performance, and maximum runtime.

### Traxxas Power Cell NiMH Battery with iD

Stampede 4X4 includes a Traxxas iD™ Power Cell™ Battery Packs are optimized for free-flowing power and maximum punch with premium quality, low-resistance cells; flexible, silicone-jacketed 12-gauge wire; heavy-duty welded tabs; and Traxxas High-Current Connectors. Traxxas iD chargers (sold separately) auto-detect iD-equipped Power Cell batteries and automatically set and optimize charge settings. Precision assembly with attractive, individually wrapped cells and clear overwrap complete the package.

### Traxxas High-Current Connector

The quest for ultimate speed began with the battery connector. As today's batteries store more and more energy inside their cells, traditional battery connectors became a roadblock, unable to deliver all the energy the battery is capable of outputting. The patented Traxxas High-Current Connector opens the door for unrestricted current flow. For more info about the patented Traxxas High-Current Connector click [here](#).

## Modular Simplicity

Old designs made servicing of 4-wheel drive vehicles cumbersome and time-consuming. Traxxas has a better way. Modular design allows the entire front section to be removed with just five screws, and the

rear assembly with just four screws. In less than a minute using a power screwdriver, you have full access for easy service and adjustment.

### **Traxxas TQ 2.4GHz Ready-To-Drive Radio System**

Stampede 4X4 is equipped with the new TQ 2.4GHz radio system. The TQ's modern design features an internal antenna for a sleek look, and an ergonomic grip for all-day driving comfort. 2.4GHz technology means there's no need to worry about frequency conflicts, no matter how many other drivers you're racing with. Just switch on and drive -- the TQ automatically locates and locks onto an open frequency.

### **Ultra Efficient Shaft-Driven 4WD**

Stampede 4X4 uses just three gear meshes to drive all four wheels, eliminating the need for a multi-gear transmission. The highly efficient drivetrain spins effortlessly on rubber-sealed ball bearings, and is integrated seamlessly into the unique chassis for optimum performance and easy maintenance. There are no dogbones to wear, no drive cups to wobble. A single center driveshaft connects the front and rear

drive assemblies for maximum power transfer. The shaft runs perfectly straight and true and offers superior durability. A clear cover shows off the high-tech look while keeping dirt and debris away from the shaft.

### Sealed Electronics Extend Your Driving Fun

Only Traxxas lets you experience monster truck 4WD excitement year-round, no matter what mother nature has to offer. Water, mud, and snow don't slow down Stampede 4X4; its electronic speed control, receiver box, and high-torque digital steering servo are all waterproof for no-worry fun in wet conditions that send other trucks running for cover. Drive Stampede 4X4 where you want, when you want—the only limit is your imagination.

### Modified Muscle

To harness the torque of the Titan 12-turn motor, Traxxas bolted in the high-performance, waterproof

XL-5 electronic speed control. EZ-Set® one-button setup makes it easy to adjust or change profiles. Traxxas' exclusive patented Training Mode™ profile cuts total power output in half and leaves the brakes at full strength. It's the first controller of its kind that has a 50% power profile. Training Mode is designed for young or first time drivers that want to learn the ropes before unleashing the full power of the mighty Titan 12T motor. This makes the Stampede 4X4 perfect for almost any age driver or skill level.

The Stampede 4X4 comes fully loaded with innovative performance options like a fiber-composite chassis designed for exceptional rigidity and enormous ground clearance. Battery removal is made easy by the quick-release battery hold down latch. Just take the Stampede 4X4 out of the box, charge up a battery, and go have fun! If you're looking for a monster truck that is perfect for bashing or car-crushing thrills, look no further. Stampede 4X4 is all you need.

### **100% Fully Assembled and Ready-To-Race®**

Stampede 4X4 comes fully-assembled and Ready-To-Race® with the TQ 2.4GHz radio system, XL-5 electronic speed control, Titan 12T motor, painted and decaled body, pre-glued tires, and Quick Start Guide. Traxxas backs Stampede 4X4 and all of our products with top-notch support that is second to none. A staff of skilled representatives is on-hand to answer your questions via phone, website, or e-mail. Unmatched parts support allows Stampede 4X4 to be serviced with parts and support from thousands of hobby dealers worldwide. Your investment is also protected by the Traxxas Lifetime Electronics Warranty. Traxxas goes the extra mile to ensure that your R/C experience is easy and fun (and fast!). Follow the details link at left to go in depth on all the Stampede 4X4 performance benefits, and also be sure to check out the videos page to see Stampede 4X4 in action for yourself.

#### **QUICK FEATURES ON STAMPEDE 4X4 BRUSHED (#67054-1)**

- TQ™ 2.4GHz radio system
- 4amp DC Peak Detecting Fast Charger
- Traxxas 7-cell NiMH battery with iD™
- Waterproof electronics all-weather, all-season R/C excitement
- Watertight receiver box and #6519 3-channel micro receiver
- Titan® 12-Turn 550 modified motor
- XL-5 electronic speed control
- Tough fiber-composite construction
- Chevron Maxx™ 2.8" tires with foam inserts pre-glued on chrome All-Star™ wheels
- ProGraphix® painted body graphics
- Powder-coated white springs

**MODEL 67054-1:** Fully assembled, Ready-To-Drive®, TQ 2.4GHz Radio System, XL-5 electronic speed control, 4amp DC Peak Detecting Fast Charger , and ProGraphix® painted body.
